INDUSTRY EXPERIENCE

•**Search Relevance Team, ByteDance**

Jan. 2024 - Apr. 2024

Algorithm Engineer

Proposed an adapter module to bridge the relevance model used in production with an LLM. The adapter transformed representations from the traditional model into LLM-compatible hidden states, enabling:

- Joint utilization of pretrained traditional models and powerful LLM reasoning capabilities.
- Robust handling of out-of-vocabulary and multilingual inputs.
- A representation model plus LLM framework extensible to user-isolated data or multimodal input scenarios.
